

ECO-WEEK

Dear Parents,

Next week is **ECO-WEEK**, which means the children's learning will be centred around environmental themes across the curriculum. The focus will be on the Eco School Action Plan to reduce plastic in order to look after marine life, conserve water and energy.

The idea behind Eco Week is not as an isolated focus but to supercharge the eco message to our school community: 'Make Every day Eco Day'. In other words, it is embedded in our curriculum on a daily basis. The awareness is already very much part of our school, we just need to build on it and keep it going for the future.

There will be speakers from Wessex Water and Water Aid with activities to follow. Other opportunities include taking part in a beeswax food wrap workshop, seed bomb planting, bug hotel building and a chance to create a 'Vision Board', a collage of images that represent goals and dreams for our future world.

There will be other lessons in class in English Maths, Art and DT with an ECO theme.

On Monday there will be a litter-pick either in the school grounds or around the village or Greyfield Woods. *(Permission for local off-site visits has already been requested, and is assumed unless otherwise notified.)*

Looking forward to what will be an enjoyable and worthwhile experience!

Juliet Bailey

Eco-Coordinator
