

## **Remote education provision: information for parents**

This information is intended to provide clarity and transparency to pupils and parents or carers about what to expect from remote education where national or local restrictions require entire cohorts (or bubbles) to remain at home.

For details of what to expect where individual pupils are self-isolating, please see the final section of this page.

This guide should be read alongside the MNSP Remote Learning Policy.

### **The remote curriculum: what is taught to pupils at home**

A pupil's first day or two of being educated remotely might look different from our standard approach, while we take all necessary actions to prepare for a longer period of remote teaching.

**Following the first few days of remote education, will my child be taught broadly the same curriculum as they would if they were in school?**

We will teach the same curriculum remotely as we do in school wherever possible and appropriate. However, we will need to make some adaptations in some subjects. For example, PE will be suggested activities for children to complete at home independently along with some links to online fitness videos ideas.

Children will have daily English and Maths lessons, along with suggested spelling, grammar or handwriting activities and times tables / number facts activities. Younger children will have daily phonics sessions provided. Children are expected to read daily.

Remote Education: Information for Parents

Children will have a daily wider curriculum lesson. This will be based on the curriculum each class would normally be learning in school.

All subjects will be taught during a national lockdown, however some subjects may need additional catch up work when all children return to school e.g.: Music, D&T.

Classes will have regular catch up and story times in the afternoon, with a whole school assembly on a Friday.

Friday afternoon will include a wellbeing activity.

## Remote teaching and study time each day

### How long can I expect work set by the school to take my child each day?

We expect that remote education (including remote teaching and independent work) will take pupils broadly the following number of hours each day:

Early Years	On average over a week these children will be provided with 2 hours remote learning.
Key Stage 1	On average over a week these children will be provided with 3 hours remote learning.
Key Stage 2	On average over a week these children will be provided with 4 hours remote learning.

## Accessing remote education

### How will my child access any online remote education you are providing?

We will use Google Classroom to set daily learning. Children/parents will have work set daily on Google Classroom. This will include links to live lessons, work to be handed in and links to clips or powerpoints children are required to watch.

Children have Google Classroom logins and support can be provided for difficulty connecting to Google Classroom by phoning the school.

Our school website will include lots of additional information for parents throughout the Covid-19 pandemic:

<https://www.hemingtonprimary.co.uk/>

When expected to join a live session a link will be posted onto your child's Google Classroom page. This will be a secure link that should not be shared with anyone else. Where possible these will be at the same time each day / week and will be timetabled to avoid siblings being in live sessions at the same time.

As part of our provision, children will also be sent YouTube videos of pre-recorded lessons. These will be from recognised channels eg: Read, Write Inc. or BBC.

Please remember, if at any point a parent or child is concerned about something they have viewed online they should report it immediately to the school and if appropriate to [CEOP](#).

## **If my child does not have digital or online access at home, how will you support them to access remote education?**

We recognise that some pupils may not have suitable online access at home. We take the following approaches to support those pupils to access remote education:

If your child is struggling to access online learning due to a digital access difficulty then please contact the school office ([office@hemingtonprimary.co.uk](mailto:office@hemingtonprimary.co.uk)) so we are aware of the nature of the difficulty and can do all that we can to support and help. The help we are able to offer will depend on the nature of difficulties and resources available to us at the time.

- We may be able to lend your child a school chrome book.
- We may be able to give you access to an unlimited-data SIM.
- We may be able to apply for a 4G router.

Teachers will ensure that no work is set that requires any resources to be printed. Packs of work and resources will be delivered as needed to children at home. Children are asked to complete their work in their exercise books and may be asked to upload photos of their work onto Google Classroom. Teachers then provide feedback.

## **How will my child be taught remotely?**

We use a combination of the following approaches to teach pupils remotely:

- live teaching (online lessons)
- recorded teaching (e.g. video/audio recordings made by teachers)
- textbooks, reading books and other resources pupils have at home

Remote Education: Information for Parents

- commercially available websites supporting the teaching of specific subjects or areas, including video clips or sequences
- Online reading schemes and libraries
- Instructional daily work set on Google Classroom with activities and tasks provided and explained

## Engagement and feedback

**What are your expectations for my child's engagement and the support that we as parents and carers should provide at home?**

We expect all children to 'have a go' each day.

Teachers will explain, via Google Classroom, what work should be handed in each day - not all work will need to be uploaded.

We endeavour to make the daily learning as accessible as possible for children to access with minimal support or instruction from parents at home. This is because we recognise the challenges for parents with more than one child at home and / or are working from home. The inclusions of written, recorded or live instructions support children to be as independent as possible.

We expect parents to encourage their children to do their best.

We ask parents to support children to establish a daily routine that fits around everyone in the household and to help as necessary with setting up digital devices for the day. Some children will need parental support to upload their work to their Google Classroom each day or to log onto live links. Please support your children to join in live sessions as they are an opportunity for the teacher to 'touch base' with your child and also to support with instant feedback on learning difficulties.

We expect parents to contact us if they or their child are struggling so that we can offer support and guidance. When children are

#### Remote Education: Information for Parents

struggling, class teachers may suggest key learning to prioritise such as phonics and reading.

Older children can use Google Classroom to message a teacher if they are finding an aspect of the learning challenging. Teachers are available during the afternoon to respond with help.

### **How will you check whether my child is engaging with their work and how will I be informed if there are concerns?**

Teachers will keep a daily and weekly checklist showing who is engaging and to what extent they are engaging. Teachers will also track who attends the live sessions.

In the first instance of a concern over engagement, the class teacher will contact the parent with a phone call. If the child continues to struggle to engage the head of school will make contact to discuss our concerns and further ways school could support the child.

There will be a weekly whole school celebration assembly. This will also be an opportunity for the class teacher to reinforce good learning behaviours and to enable children to continue to feel part of school life.

### **How will you assess my child's work and progress?**

Feedback can take many forms and may not always mean extensive written comments for individual children. For example, whole-class feedback or quizzes marked automatically via digital platforms are also valid and effective methods, amongst many others. Our approach to feeding back on pupil work is as follows:

#### Remote Education: Information for Parents

- Written feedback on set pieces of work throughout the week, sent as comments via Google Classroom.
- Summary sessions as part of live lessons
- Occasional Quizzes
- Teachers will track general achievement based on the work which is uploaded to Google Classroom. The nature of this will depend on the subject and task. Eg. spelling test scores. It is not possible for a teacher to be certain the extent to which a child needed support from a parent and so the information is a guide only to inform planning when the class return to school

## Additional support for pupils with particular needs

### How will you work with me to help my child who needs additional support from adults at home to access remote education?

We recognise that some pupils, for example some pupils with special educational needs and disabilities (SEND), may not be able to access remote education without support from adults at home. We acknowledge the difficulties this may place on families, and we will work with parents and carers to support those pupils in the following ways:

- Parents of pupils with SEN will be contacted by the SENCO to plan how we will support their child.
- Some children with SEN will be invited into school as they will be classed as 'vulnerable' pupils
- Work on Google Classroom will be differentiated to include opportunities for all pupils. Pupils will be directed to the correct level activity to access.
- Some pupils will have different work set, planned and delivered by teachers and teaching assistants
- Where pupils are attending school, interventions will be delivered within school as far as is possible with available staffing. These will include speech and language, 5 minute box and 1:1 reading

#### Remote Education: Information for Parents

- Where children receive support from an outside agency, the school will arrange for this support to continue either in school or remotely
- For younger pupils who may need support from parents, we will ensure the work set is clear and that the class teacher is available for questions via Google Classroom or on the phone.
- The Covid 19 page on the website will have additional links and ideas for children to access at home to support the learning provided by school

## Remote education for self-isolating pupils

Where individual pupils need to self-isolate but the majority of their peer group remains in school, how remote education is provided will likely differ from the approach for whole groups. This is due to the challenges of teaching pupils both at home and in school.

### **If my child is not in school because they are self-isolating, how will their remote education differ from the approaches described above?**

The class teacher will make regular contact with you to help us understand your situation and how we can best provide education for your child through these circumstances.

Generally, the class teacher will send a daily set of learning based on the previous day's learning in class. This will allow the child who is shielding to keep pace with the whole class but without increasing teaching workload.

The EWO may also contact the family to offer their services and support.

If the child at home is struggling or they are not engaging, we will act in the same way as outlined above to support.
