Dear Parents and Carers,

Safeguarding Issue - WhatsApp

We have had a number of problems in school in recent weeks caused by children in Year 5 and 6 using WhatsApp outside of school. This is a serious issue with children often making poor choices about what they say and how they say it, resulting in significant upset.

The minimum age of use for WhatsApp is 16 years old. It had previously dropped to 13 years old but in April 2018 returned to 16. Like many age restrictions on social media apps, some children under the age of 16 may choose to ignore this and sign up for WhatsApp.

The main issues are:

- Children using the app unsupervised.
- Messages are private to the group so parents and carers may not realise if their child is having difficulties.
- Individuals can be invited to join a group chat without them first giving consent. They may then feel awkward about how they will be perceived by others if they wish to leave the group.
- The group administrator(s) can block group members. This is sometimes poorly handled.
- Although an unkind or badly worded message can be deleted, this can take up to 7 minutes and may already have been seen by others.

Whilst WhatsApp is an amazing tool for communication for adults, in our experience primary children simply do not have the maturity to use Whatsapp. In the worst cases, this can lead to cyberbullying and children anxious about coming to school.

Therefore, I urge all of our parents and carers to delete WhatsApp from their child's phone and to monitor how their child is communicating with their friends. This may seem draconian; however, we must ensure that our children learn to use social media responsibly for their sake and the wellbeing of others. This includes allowing them to use social media at an appropriate age whilst providing guidance and supervision.

For greater detail about how WhatsApp works and the potential issues, please see the accompanying leaflet.

Best regards,

Alun Randell
Head Teacher

What Parents & Carers Need to Know About

WHATSAPP

16+

in UK & EU;
12+ rest of
world.

WhatsApp is the world's most popular messaging service, with around two billion users exchanging texts, photos, videos and documents, and making voice and video calls. The app offers end-to-end encryption, meaning messages can only be read by the sender and the recipient(s). Not even WhatsApp can read them. Updates to its privacy policy in 2021 reportedly caused millions of users to leave the app. But the new policy was widely misinterpreted: it only related to WhatsApp's business features, not to personal messages.

'Prize' Scams

WhatsApp users occasionally receive messages from unauthorised third parties or fraudsters pretending to offer prizes – encouraging recipients to click a link to win. A common scam involves a warning that someone's WhatsApp subscription has run out: aiming to dupe them into disclosing payment details. Other scams include instructions to forward a message to earn a gift or reward.

Enabling Fake News

WhatsApp has unfortunately been linked to accelerating the spread of dangerous rumours. In India, some outbreaks of mob violence were reported to have been sparked by false allegations shared on the app. WhatsApp itself took steps to prevent its users circulating hazardous theories and speculation in the early weeks of the Covid-19 pandemic.

Connections with Strangers

To start a WhatsApp chat, you need the mobile number of the person you want to message (they also need to have the app). WhatsApp can also access the address book on someone's device and recognise which of their contacts use WhatsApp. If your child has given their mobile number to somebody they don't know, that person could then use it to get in touch via WhatsApp.

Disappearing Messages

By enabling 'Disappearing Messages', users can set messages to disappear in 24 hours, 7 days or 90 days by default. Users are also able to send photos and videos that disappear after the recipient has viewed them. This media can't be saved or forwarded, making monitoring what children are talking about problematic. Equally, if your child is sent an inappropriate message, it makes it difficult to prove any wrongdoing. However, the receiver can take a screenshot, saving the media as a photo.

'Only Admins' and Cyberbullying

Group chats and video calls are great for connecting with multiple people in WhatsApp, but there is always the potential for someone's feelings to be hurt by an unkind comment or joke. The 'only admins' feature gives the admin(s) of a group control over who can send messages. They can, for example, block people from posting in a chat, which could make a child feel excluded and upset.

Live Location Sharing

The 'live location' feature lets users share their current whereabouts, allowing friends to see their movements. WhatsApp describes it as a "simple and secure way to let people know where you are." Indeed, it is a useful method for a child to let loved ones know they are safe. But if your child is in a chat with people they don't know, it means they will be exposing their location to them, too.

Advice for Parents & Carers

Report Potential Scams

Advise your child not to engage with any message that looks suspicious or too good to be true. When your child receives a message from an unknown number for the first time, they will be given the option to report that number as spam. They can also report a contact or a group as spam by tapping on the contact or group name to open their profile and scrolling down to 'report spam'.

Create a Safe Profile

Even though someone would need your child's phone number to add them as a contact, as an extra precaution it's worth altering your young one's profile settings to restrict who can see their photo and status. The options are 'everyone', 'my contacts' and 'nobody.' Choosing one of the latter two ensures their profile is protected.

Use Location Features Sparingly

If your child needs to use 'live location' to show you or their friends where they are, advise them to share their location only for as long as they need to. WhatsApp gives 'live location' options of 15 minutes, one hour or eight hours. However, your child can manually choose to stop sharing their position at any time.

Fact-Check Messages

You can now fact-check messages that have been forwarded at least five times in WhatsApp, by double-tapping the magnifying glass icon to the right of the message. From there, your child can launch a Google search and decide for themselves whether the message was accurate or not. It's a good way to encourage young people to question things they see online.

Explain about Blocking

If your child receives spam or offensive messages, calls or files from a contact, they should block them. Communication from a blocked contact won't show up on their device and stays undelivered. Blocking someone does not remove them from your child's contact list – they would also need to be deleted from the device's address book. The option to block someone is on their contact info screen.

Leave a Group

If your child is part of a group chat that makes them feel uncomfortable, or has been added to a group that they no longer want to be part of, show them how to use the group's settings to leave. If someone exits a group, the admin can add them back in once; if they leave a second time, it is permanent.

Delete Accidental Messages

If your child has posted a message in the wrong chat or sent a message that they immediately regret, they can delete it. Tap and hold on the message, choose 'delete' and then 'delete for everyone.' WhatsApp allows seven minutes to delete a message after it's sent – but it's important to remember that recipients may have seen (and taken a screenshot of) a message before it was deleted.
