

## EYFS Curriculum Progression

### Understanding The World - Geography

In Early Years understanding the world through Geography is an important part of our curriculum. 'Understanding the World' encompasses a range of early geographical skills and knowledge in Early Years. Our focus for teaching and learning is on hands-on experience and developing the language and communication skills that will enable children to make comparisons, ask questions and make connections in their experiences. The children's developing understanding of place and community is like an ever-widening circle. We start by talking with the children about their homes, the people who live with them and the people who are important to them. We also talk about what makes them the same or different to other children. The children start to become aware of the local landmarks that are significant to them and we incorporate photographs of these into a small world and block play. In Reception, teachers talk about maps and use 'mapping' skills to plot place and story. We talk about Midsomer Norton and beyond and develop the children's understanding of place through talking about where we live, local landmarks and where other significant people in individual children's lives live. Later in the Reception year we introduce a direct comparison of landscape and climate through the introduction of the Rainforest.

Alongside planned learning, children are encouraged to follow their own interests and create ideas around their own fascinations.

### **Implementation:**

	<b>Learning experiences</b>	<b>Key vocabulary &amp; what children need to know</b>	<b>Outcomes</b>
<b>Nursery 2 year old Provision</b>	Explore the features of the outside area  Block play - creating buildings from imagination based on own first	Inside, outside, around, under, next to, shop, house, factory, farm, church, garage, school	Explore and respond to different natural phenomena in their
