

Geography Progression Document

A high-quality geography education should inspire in pupils a curiosity and fascination about the world and its people that will remain with them for the rest of their lives. Teaching should equip pupils with knowledge about **diverse places, people, resources** and **natural and human environments**, together with a deep understanding of the Earth's key **physical and human processes**. As pupils progress, their growing knowledge about the world should help them to deepen their understanding of the interaction between physical and human processes, and of the formation and use of **landscapes and environments**. Geographical knowledge, understanding and skills provide the frameworks and approaches that explain how the Earth's features at different scales are shaped, interconnected and change over time.

The national curriculum for geography aims to ensure that all pupils:

- develop contextual knowledge of the location of globally significant places – both terrestrial and marine – including their defining **physical and human characteristics** and how these provide a geographical context for understanding the actions of processes
- understand the processes that give rise to key **physical and human geographical features** of the world, how these are **interdependent** and how they bring about spatial variation and change over time
- are competent in the geographical skills needed to:
- **collect, analyse and communicate with a range of data** gathered through experiences of fieldwork that deepen their understanding of geographical processes
- interpret a range of **sources of geographical information**, including maps, diagrams, globes, aerial photographs and Geographical Information Systems (GIS)
- communicate geographical information in a variety of ways, including through maps, numerical and quantitative skills and writing at length.

Threshold Concepts: Human features, Physical features, Environments, Climate, Physical processes, Interdependence, Resources, Maps, Data and Information.

How learning builds from the Early Years :

The key concepts for geography are introduced in the Early Years Foundation Stage. They are revisited through topics and detailed information about vocabulary is contained in the EYFS plans.

Location: Know the location of their town/ village on a map of the UK. Know the location of a contrasting place on a map. Know what a country, sea and ocean are.

Maps: Know that a map is an image representing a place, and that symbols are used to show places on a map. Read and follow a simple map in the school grounds. Map favourite places in the local area in relation to their school.

Climate: Know the main weather conditions of the 4 seasons, and their names.

Physical and human features: Learn the different types of homes that people live in in the locality. Learn about the significant places that are close to home and form part of their community. Learn that some features are physical and some are human features. Investigate some physical and human features of another location, a beach and farm.

<p>Sticky Knowledge</p>	<p>Location-</p> <p>The location of England, Scotland, Wales, N Ireland, the names of capital cities, the English channel, North and Irish seas, capital cities in the UK. Location within continent of Europe</p> <p>Location of Hong Kong and the continent of Asia</p> <p>Location of the Earth's poles and equator</p> <p>The 4 points of the compass.</p> <p>Human features:</p> <p>The definition of a human feature and the meaning of : urban, city, town, village, factory, farm, house, flat, office, port, harbour and shop, transport</p> <p>Location of the main human landmarks in the UK: Stonehenge, the London Eye, Houses of Parliament, Edinburgh Castle. Comparison of human features of Hong Kong, city, town, transport, homes, port</p> <p>Human features of their own town or village and some well known ones in the local area.</p> <p>Physical features:</p> <p>key physical features of the UK , islands, beaches, cliffs , coasts , ,</p>	<p>Location</p> <p>Pupils know and can name the world's _continents and oceans. Location of Australia in the Southern Hemisphere.</p> <p>Australia's location in relation to its surrounding countries, continents and oceans. The main landform regions of Australia, namely desert, coastal areas, grasslands and . Location of the Equator and tropics. Location of the tropics Location of world climate zones. Pupils locate Australia's largest cities and most populated areas</p> <p>Human features</p> <p>The growth of population in Australia's cities. The reasons for settlement in coastal areas and the types of homes built in densely populated areas. Compare human features with their own location.</p> <p>Physical features</p> <p>Key features of Australia's landform regions: lake, desert, mountain ranges.</p> <p>Climate</p> <p>Concept of climate, climate zones, significance of the the equator on climate, the definition of a desert</p>	<p>Location</p> <p>Locate Europe's countries and capitals. Locate the world climate zones and Europe's position within them. Locate the Alpine region, River Volga, Rhine River Thames. Know the location of Mt Etna and Vesuvius, Mediterranean Sea, Pyrenees.</p> <p>Location of the world's longest rivers, the River Severn and the Thames in the UK. Location of the Angel Falls in Venezuela</p> <p>Human features</p> <p>Key landmarks of Europe. The population of Europe's largest capital cities. The main traded goods of the UK and other European countries. Understand terms import and export.</p> <p>Humans have used/adapted rivers for energy, water, transportation (trade and leisure) and tourism.</p> <p>Physical features</p> <p>Understand the term topography. Know what rivers, lakes, mountains and volcanoes are, know the definition of a mountain range and a biome. Know what a glacier is.</p>	<p>Location</p> <p>South Pole. Antarctica. Antarctic Circle. Southern Ocean.</p> <p>Countries of North America . Major cities, largest lake, longest river, highest mountain in the US. Mountain ranges and neighbouring countries.</p> <p>Location of the region around Athens and/or Naples/Pompeii, from global to local</p> <p>Human features</p> <p>Global warming in Antarctica</p> <p>Land use, urban development and population density in NYC</p> <p>The distribution of population towards coastal states and in cities in the US.</p> <p>Intensive farming in the Midwest US states.</p> <p>The impact of human processes of tourism, migration and agriculture impact on the Meditterean regions. Compared to own locality.</p> <p>Physical features</p> <p>Ice shelves, glaciers and icebergs. The mountainous environment of Antarctica and its size and depth.</p>	<p>Location</p> <p>Location of the world's rainforests and the location of the Amazon Rainforest within South America</p> <p>Know where the tropics are in relation to the Equator, Tropic of Cancer and Tropic of Capricorn.</p> <p>Location of the World's tectonic plates</p> <p>Location of the world's main mountain ranges and those in the UK. Location of the Himalayas in Asia and Nepal.</p> <p>Location of the world's developed and developing countries Location of Liberia as a case study</p> <p>Human features</p> <p>Logging, deforestation. Population increase and agriculture in the rainforest</p> <p>Terracing in the mountain valleys of Nepal.</p> <p>Trade, primary, secondary and tertiary industry. Local and global trade technology, transport and communications import and export .Developed and developing countries</p> <p>Physical features</p> <p>The structure of the rainforest, canopy, emergent layer. The ecosystems of the rainforest. .</p>	<p>Location</p> <p>Location of Kenya and the Masia Mara reserve.</p> <p>Location of worlds' tectonic plates, fault lines, concentration of volcanoes. Location of the "Ring of Fire", Vesuvius and the San Andreas fault.</p> <p>Location of the UK's major cities and towns, population distribution, major transport hubs, rail and road routes. Location of main agricultural regions of the UK and their produce. Location of the UK's mountain ranges and largest rivers.</p> <p>Human features</p> <p>Tourism and mass urbanisation have changed life in Kenya.Spread of the city of Nairobi and land use in cities.</p> <p>Population and population distribution of the UK and local area. Settlement, land use, trade and economic activity in the local area and contrasting locality in the North/ Midlands. Shifts from primary and secondary industries to tertiary and changes in land use. Changes over time in industry and land use in local area</p>

	<p>beaches, forests, hills, lakes and mountains, seas, rivers.</p> <p>Physical features of Hong Kong's Islands: harbours, villages, forests, beaches and mountains.</p> <p>Physical features of their own town or village and some in the local area such as Wookey Hole caves, Cheddar Gorge</p> <p>Climate</p> <p>The weather is the conditions of the atmosphere, including temperature, wind and rain. The seasons of the Northern Hemisphere and how they affect the weather, how seasons are caused by Earth moving around the sun.</p> <p>Maps, data and information</p> <p>Compass points NSEW on a world map. Recognise transport links in a city centre map. Recognise the meaning of weather symbols. Interpret rainfall charts and log weather conditions</p>	<p>Two climate zones in Australia: arid, and tropical. Causes of extreme weather events of bushfires and drought. The impact of climate on where people live and everyday life in Australia, such as in Townsville Australia.</p> <p>Maps, data and information</p> <p>Use globes, atlases and Google Earth. Identify and label the continents, oceans and climate zones on a world map. Label land regions, main cities and physical features on a map of Australia. Interpret climate and population density maps from Digimap.</p>	<p>Understand the term biome and the particular topography, climate, and ecosystems of the Alpine region and the Russian Taiga Forest. Alpine plants have adapted and the ecosystem is unique</p> <p>Climate</p> <p>Much of Europe is in the temperate climate zone, but weather varies. Alpine climates are colder, with snow in winter and colder temperatures at higher altitudes. The Taiga is a sub-polar climate with a permafrost.</p> <p>Physical processes</p> <p>The formation and movement of glaciers, and impact of glaciation.</p> <p>Water cycle.</p> <p>Stages of a river. Erosion, transportation, deposition.</p> <p>Interdependence</p> <p>Know the human impact that flooding has and the negative impact of pollution on rivers.</p> <p>Know how the river is used for washing, fishing and irrigation on the River Zambezi.</p>	<p>The impact of physical geography, volcanoes, and coastal features volcanic activity in the Bay of Naples.</p> <p>Antarctica as a biome and the bird and sea life of the continent</p> <p>The Grand Canyon as a desert biome.</p> <p>Climate</p> <p>Antarctica is a frozen desert with very low precipitation.</p> <p>Climate zones in the US vary with latitude and from subtropical in Florida to sub-polar in Alaska. The US has desert regions. Know the tropics of Cancer and Capricorn.</p> <p>Physical processes</p> <p>The formation of glaciers, ice shelves and icebergs in Antarctica.</p> <p>The significance of lines of latitude and longitude and time zones in US and Antarctica</p> <p>The formation of the Grand Canyon. The definition of hurricanes and droughts</p> <p>Interdependence</p> <p>The importance of Antarctica in providing a habitat for sea life and birds, and regulating the Earth's temperature.</p>	<p>The structure of a mountain and mountain range, summit, slope, valley, altitude</p> <p>The natural resources of countries determine the types of exports and imports.</p> <p>Know that rainforests are biomes. Some are temperate, others are tropical.</p> <p>Climate</p> <p>Tropical rainforests are located in the tropics, i.e. close to the Equator. Know the tropics of Cancer and Capricorn.</p> <p>Mountain climate cold and higher altitude means less oxygen</p> <p>Physical processes</p> <p>Water cycle and rainfall in the rainforest</p> <p>The structure of the world's tectonic plates The formation of fold, dome fault-block, volcano Formation of glaciers and avalanches.</p> <p>Interdependence</p> <p>Rainforest is a rich and diverse provider of food for humans. The rainforests are used by humans to develop agriculture and use mineral resources. Amazon rainforest produces one-fifth of the world's oxygen.</p>	<p>migration, and ethnicity</p> <p>Farming types, arable, dairy, market and hill sheep farming and main produce of the UK's regions</p> <p>Home building in earthquake and volcano zones, infrastructure, agriculture.</p> <p>Physical features</p> <p>Features of the African savannah</p> <p>Topographical features of the UK, rivers, mountains, coasts</p> <p>Main vegetation belts of the UK, moorlands, forests</p> <p>Relief and soil zones of the UK</p> <p>Fault lines, tectonic plates, volcanic and seismic activity.</p> <p>Savannah in Kenya, a grassland with few trees</p> <p>The Masai Mara ecosystem with one of the largest annual animal migrations</p> <p>The ecosystem of British moorlands</p> <p>Climate</p>
--	---	---	--	---	--	---

			<p>Maps, data and information</p> <p>Know 4-figure grid references and standard OS map symbols.</p>	<p>The impact of droughts and flooding on farming. The human impact of hurricanes in the US</p> <p>Resources:</p> <p>Know the main economic activity in a Mediterranean city (agriculture, shipping and tourism in Naples) and compare it to economic activity in Bath.</p> <p>Maps, data and information</p> <p>Use satellite images, photographs and thermal imaging to interpret Antarctic conditions.</p> <p>Use topographical maps of the US, know where the Equator, tropics, hemispheres and North American countries , mountain ranges and main rivers are located on a map.</p>	<p>Mountain communities use fertile land and natural resources</p> <p>The interdependence of global trade and that more developed countries export valuable manufactured goods and import less valuable, primary products. Disadvantages of globalisation for developing countries.</p> <p>Resources:</p> <p>Mountain environments provide precious minerals for mining. Land around mountains can be fertile.</p> <p>The location and distribution of natural food resources around the world, the global supply chain for cotton, coffee, tea and other food products The ethics of global and fair trade.</p> <p>Maps, data and information</p> <p>8-point compass points</p> <p>6 figure grid references, and OS Map symbols</p>	<p>Regional climate and differences in mountain areas</p> <p>Climate change has changed life in Kenya in the Maasai. Kenya lies on the Equator and has a tropical climate. Rainfall patterns threaten crops and cause drought and hunger.</p> <p>Physical processes</p> <p>Global warming as a result of increased CO2 emissions</p> <p>The formation of volcanoes and causes of earthquakes.</p> <p>Interdependence</p> <p>How drought and climate change impact urbanisation in Kenya</p> <p>How relief, climate and soil zones affect farming activity in the UK</p> <p>The interdependence on the natural environment for farming and settlements in the UK</p> <p>Resources</p> <p>The protection of natural resources and environments in the UK</p>

**Milestones-
Composite
Outcome
S**

To investigate places:

- Ask and answer geographical questions (such as: What is this place? What or who will I see in this place? What do people do in this place?).
- Identify the key features of a location in order to say whether it is a city, town, village, coastal or rural area.
- Use world maps, atlases and globes to identify the United Kingdom and its countries, as well as the countries, continents and oceans studied.
- Use simple fieldwork and observational skills to study the geography of the school and the key human and physical features of its surrounding environment.
- Use aerial images and plan perspectives to recognise landmarks and basic physical features.
- Name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas.
- Name and locate the world's continents and oceans.

To investigate places:

- Ask and answer geographical questions about the physical and human characteristics of a location.
- Explain own views about locations, giving reasons.
- Use maps, atlases, globes and digital/computer mapping to locate countries and describe features.
- Use fieldwork to observe and record the human and physical features in the local area using a range of methods including sketch maps, plans and graphs and digital technologies.
- Use a range of resources to identify the key physical and human features of a location.
- Name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, including hills, mountains, cities, rivers, key topographical features and land-use patterns; and understand how some of these aspects have changed over time.
- Name and locate the countries of Europe and identify their main physical and human characteristics.

To investigate places:

- Collect and analyse statistics and other information in order to draw clear conclusions about locations.
- Identify and describe how the physical features affect the human activity within a location.
- Use a range of geographical resources to give detailed descriptions and opinions of the characteristic features of a location.
- Use different types of fieldwork sampling (random and systematic) to observe, measure and record the human and physical features in the local area. Record the results in a range of ways.
- Analyse and give views on the effectiveness of different geographical representations of a location (such as aerial images compared with maps and topological maps - as in London's Tube map).
- Name and locate some of the countries and cities of the world and their identifying human and physical characteristics, including hills, mountains, rivers, key topographical features and land-use patterns; and understand how some of these aspects have changed over time.
- Name and locate the countries of North and South America and identify their main physical and human characteristics.

	<p>To investigate patterns:</p> <ul style="list-style-type: none"> • Understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom and of a contrasting non-European country. • Identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles. • Identify land use around the school. 	<p>To investigate patterns:</p> <ul style="list-style-type: none"> • Name and locate the Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle and date time zones. Describe some of the characteristics of these geographical areas. • Describe geographical similarities and differences between countries. • Describe how the locality of the school has changed over time. 	<p>To investigate patterns:</p> <ul style="list-style-type: none"> • Identify and describe the geographical significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, and time zones (including day and night). • Understand some of the reasons for geographical similarities and differences between countries. • Describe how locations around the world are changing and explain some of the reasons for change. • Describe geographical diversity across the world. • Describe how countries and geographical regions are interconnected and interdependent.
	<p>To communicate geographically:</p> <ul style="list-style-type: none"> • Use basic geographical vocabulary to refer to: • key physical features, including: beach, coast, forest, hills, mountains, oceans, rivers, soil, valley, vegetation and weather. • key human features, including: city, town, village, factory, farm, house, office and shop. • Use compass directions (north, south, east and west) and locational language (e.g. near and far) to describe the location of features and routes on a map. • Devise a simple map; and use and construct basic symbols in a key. Use simple grid references (A1, B1). 	<p>To communicate geographically:</p> <ul style="list-style-type: none"> • Describe key aspects of: • physical geography, including: rivers, mountains, volcanoes and earthquakes and the water cycle. • human geography, including: settlements and land use. • Use the eight points of the compass, four-figure grid references, symbols and key to communicate knowledge of the United Kingdom and the wider world. 	<p>To communicate geographically:</p> <ul style="list-style-type: none"> • Describe and understand key aspects of: • physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes and the water cycle. • human geography, including: settlements, land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals, and water supplies. • Use the eight points of the compass, four-figure grid references, symbols and a key (that uses standard Ordnance Survey symbols) to communicate knowledge of the United Kingdom and the world. • Create maps of locations identifying patterns (such as: land use, climate zones, population densities, height of land).
