

## Longvernal Maths Progression 2025/26

### Purpose

Mathematics is a creative and interconnected discipline, essential for everyday life, scientific advancement and financial literacy. Our curriculum provides a foundation for understanding the world, developing the ability to reason mathematically and fostering an appreciation for the beauty and utility of the subject.

### Core Aims

We ensure all pupils:

- **Develop Fluency:** Build deep conceptual understanding and the ability to recall and apply knowledge rapidly through varied, frequent practice.
- **Reason Mathematically:** Follow lines of enquiry, identify relationships and develop justifications or proofs using precise mathematical language.
- **Solve Problems:** Apply mathematics to routine and non-routine problems by breaking them into simpler steps and persevering in seeking solutions.

### Framework & Progression

Our curriculum progression is structured using the White Rose Hub 'small steps' approach, fully integrated with a CPA (concrete, pictorial and abstract) approach.

Threshold Concept: Number and Place Value .

Key concepts in the Early Years	<b>Counting:</b> Includes verbal rote counting and object counting	<b>Cardinality:</b> Last number counted represents how many are in the set.	<b>Subitising and Number:</b> Visual recognition of quantity of items (without counting one by one).	<b>Comparing:</b> Comparison of quantities by identifying more or less	<b>Composition:</b> Part-part-whole relationships.
	<b>Development Matters and National Curriculum Objectives</b>	<b>Sequence of Learning</b>	<b>Essential Prior knowledge for recall</b>	<b>Vocabulary</b>	<b>Key Questions for assessment and DFE ready to Progress criteria</b>
