

Purpose:

Mathematics is a creative and highly interconnected discipline that has been developed over centuries, providing the solution to some of history's most intriguing problems. It is essential to everyday life, critical to science, technology and engineering, and necessary for financial literacy and most forms of employment. A high-quality mathematics education therefore provides a foundation for understanding the world, the ability to reason mathematically, an appreciation of the beauty and power of mathematics, and a sense of enjoyment and curiosity about the subject. The national curriculum for mathematics aims to ensure that all pupils:

- become fluent in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately.
- reason mathematically by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language
- can solve problems by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions

The progression is based on 'White Rose Hub' small steps and the revised Early Learning Goals for the Early Years Foundation Stage.

Threshold Concept: Number and Place Value.

Key concepts in the Early Years	Counting: Includes verbal rote counting and object counting Development Matters and National Curriculum Objectives	Cardinality: Last number counted represents how many are in the set. Sequence of Learning	Subitising and Number: Visual recognition of quantity of items (without counting one by one). Essential Prior knowledge for recall	Comparing: Comparison of quantities by identifying more or less Vocabulary	Composition: Part-part-whole relationships. Key Questions for assessment
Early Years Foundation Stage	Early Learning Goal Number: - Have a deep understanding of numbers to 10, including the composition of each number. - Subitise (recognise quantities without counting) up to 5. - Automatically recall (without reference to - rhymes, counting or other aids) number - bonds up to 5 (including subtraction facts) and	Autumn - Match - Sort - Compare amount - Introduce 1 and 0 - Representing 1, 2, 3 - Comparing 1,2,3 - Introduce 2 - Composition of 1,2,3 - Introduce 3 - Introduce 4 - Introduce 5 - 1 more/1less - Spring - Introduce 0 - Making pairs	Development Matters 3-4 Fast recognition of up to 3 objects, without having to count them individually ('subitising'). Recite numbers past 5. Say one number for each item in order: 1,2,3,4,5. Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle'). Show 'finger numbers' up to 5. Link numerals and amounts: for example, showing the right	Counting number zero, one, two, three to twenty and beyond zero, ten, twenty one hundred none how many? count, count (up) to count on (from, to) count back (from, to) count in ones, twos tens as many as greater smaller fewer too many	Counting zero, one, two, three to twenty and beyond how many are there altogether? What is one more than? What is one less than? Using a ten frame (or equivalent representation) can

		Mathematics Curriculum	Progression		
	some number bonds to 10, including double facts. Numerical Patterns: - Verbally count beyond 20, recognising the pattern of the counting system. - Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity. - Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.	 One less How many? Representing 0 Comparing numbers to 5 Composition of 4 & 5 Equal and unequal Composition of numbers to 5 - 2 groups Composition of numbers to 5 - 3 groups Counting to 6, 7 and 8 Composition of 6, 7, 8 Sorting 6, 7, 8 Matching 6, 7, 8 Counting to 9 and 10 Comparing numbers to 9 Representing 9 and 10 Sorting 9 and 10 Ordering numerals to 10 Composition of 9 and 10 Comparing groups up to 10 Number bonds to 10 Summer Counting to 20 Matching pictures and numerals Missing Numbers Ordering numbers to 20 	number of objects to match the numeral, up to 5. Experiment with their own symbols and marks as well as numerals. Solve real world mathematical problems with numbers up to 5. 4-5: Count objects, actions and sounds Subitise Link the number symbol (numeral) with its cardinal number value. Count beyond ten. Compare numbers. Understand the 'one more than/one less than' relationship between consecutive numbers. Explore the composition of numbers to 10.	more, less, many, few odd, even every other how many times? pattern, pair guess how many, estimate nearly, close to, about the same as just over, just under too many, too few, enough, not enough Comparing and ordering numbers the same number as, as many as Of two objects/amounts: greater, more, larger, bigger less, fewer, smaller Of three or more objects/amounts: greatest, most, biggest, largest least, fewest, smallest one more, ten more one less, ten less compare order size first, second, third tenth last, last but one before, after next between above, below	Count in steps of 2, 5 and 10
Year 1	Pupils should be taught to: - count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number - count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens - given a number, identify one more and one less - identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least	Autumn - Sort objects - Count objects - Represent objects - Count, read and write forwards from any number 0-10 - Count, read and write backwards from any number 0-10 - Count one more - Count one less - One to one correspondence to start to compare groups - Compare groups using language such as equal, more/greater, less/fewer - Introduce <,> and = symbols	- Children count reliably with numbers from one to 20, place them in order and say which number is one more or one less than a given number.	Counting, properties of numbers and number sequences number zero, one, two, three to twenty and beyond zero, ten, twenty one hundred none how many? count, count (up) to, count on (from, to) count back (from, to) count in ones, twos tens more, less, many, few odd, even Place value and ordering units, ones, tens exchange	White Rose Autumn Place Value Assessment https://whiterosemath s.com/resources/asses sment/primary-assess ment/end-of-block-ass essments/ Summer Place Value to 100 Assessment https://whiterosemath s.com/resources/asses sment/primary-assess ment/primary-assess ment/end-of-block-ass essments/

Mathematics Curriculum Progression					
	- read and write numbers from 1 to 20 in numerals and words.	- Compare numbers - Order groups of objects - Order numbers - Ordinal numbers (1st, 2nd, 3rd) - The number line - Count forwards and backwards and write numbers to 20 in numerals and words - Numbers from 11-20 - Tens and ones - Count one more and one less - Compare groups of objects - Compare numbers - Order groups of objects - Order numbers Spring - Numbers to 50 - Tens and ones - Represent numbers to 50 - One more one less - Compare objects within 50 - Compare numbers within 50 - Compare numbers within 50 - Count in 2s - Count in 5s Summer - Counting to 100 - Partitioning numbers - Ordering numbers - Ordering numbers - Ordering numbers - Ordering numbers		digit 'teens' number the same number as, as many as equal to Of two objects/amounts: greater, more, larger, bigger less, fewer, smaller Of three or more objects/amounts: greatest, most, biggest, largest, least, fewest, smallest one more, ten more, one less, ten less compare, order first, second, third tenth, eleventh last, last but one before, after, next between, half-way between above, below Estimating guess how many, estimate nearly, roughly, close to about the same as just over, just under too many, too few, enough, not enough	natical hite learning for key questions.
Year 2	Pupils should be taught to: - count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward - recognise the place value of each digit in a two-digit number (tens, ones) - identify, represent and estimate numbers using different representations, including the number line - compare and order numbers from 0 up to 100; use <, > and = signs - read and write numbers to at least 100 in numerals and in words	- Count objects to 100 and read and write numbers in numerals and words - Represent numbers to 100 - Tens and ones with a part-whole model - Tens and ones using addition - Use a place value chart - Compare objects - Compare numbers - Order objects and numbers - Count in 2s, 5s and 10s - Count in 3s	 Read and write numbers from 1 to 20 in numerals and words Identify and represent numbers using objects and pictorial representations including the number line Use the language of more than/less than (fewer), most, least, equal to when comparing the value of numbers Count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number Count in multiples of twos, fives and tens 	Counting, properties of numbers and number sequences number zero, one, two, three to twenty and beyond zero, ten, twenty one hundred zero, one hundred, two hundred one thousand none how many? count, count (up) to, count on (from, to) count back (from, to) count in ones, twos, threes, fours, fives, tens and so on more, less, many, few tally	White Rose Place Value Assessment https://whiterosemath s.com/wp-content/upl oads/2018/08/Year-2-P lace-Value_End-of-Bloc k-Assessment.pdf See also mathematical talk section in white rose scheme of learning for key questions.

Mathematics Curriculum Progression					
	 identify, represent and estimate numbers using different representations read and write numbers up to 1000 in numerals and in words solve number problems and practical problems involving these ideas. 	- Count in 50s	 Understand place value in numbers up to 1000 Use <, > and = symbols Count in steps of 2, 3 and 5 from 0 Count in tens from any number, forward and backward 	Notation Use of <, > and = symbols when comparing numbers	ST JOHN'S SCHOOL
Year 4	Pupils should be taught to count in multiples of 6, 7, 9, 25 and 1000 find 1000 more or less than a given number count backwards through zero to include negative numbers recognise the place value of each digit in a four-digit number (thousands, hundreds,tens, and ones) order and compare numbers beyond 1000 identify, represent and estimate numbers using different representations round any number to the nearest 10, 100 or 1000 solve number and practical problems that involve all of the above and with increasingly large positive numbers read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.	- Roman numerals to 100 - Round to the nearest 10 - Round to the nearest 100 - Count in 1000s - 1000s, 100s, 10s,1s - Partitioning - Number line to 10,000 - 1000 more or less - Compare numbers - Order numbers - Round to the nearest 1000 - Count in 25s - Negative numbers	 Understand place value in numbers up to three digits Know the Roman numerals I, V and X Read Roman numerals up to XII Use zero as a place holder in two- and three-digit numbers Use and interpret a number line to represent numbers 	Tenths, hundredths, decimal (places), round (to nearest), thousand more/less than, negative integers, count through zero, Roman numerals I to C	White Rose Place Value Assessment https://whiterosemath s.com/wp-content/upl oads/2018/08/Year-4-P lace-Value End-of-Bloc k-Assessment.pdf See also mathematical talk section in white rose scheme of learning for key questions.
Year 5	Pupils should be taught to: - read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit - count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000 - interpret negative numbers in context, count forwards and backwards with positive and	- Numbers to 10,000 - Roman numerals to 1,000 - Round to the nearest 10, 100, 1,000 - Numbers to 100,000 - Compare and order numbers to 100,000 - Round numbers within 100,000 - Numbers to a million - Counting in 10s, 100s, 1,000s, 10,000s, 100,000s	 Recognise and use factor pairs and commutativity in mental calculations Understand and use place value in four-digit numbers Know Roman numerals from I to C Read numbers written in Roman numerals up to 100 Count forwards and backwards in whole number steps 	Place value, Digit Roman numerals Negative number Multiple, (Common) factor Divisible Factor pairs, Prime number, Composite number, Square number, Cube number Power Notation	White Rose Place Value Assessment https://whiterosemath s.com/wp-content/upl oads/2018/08/Year-5-P lace-Value End-of-Bloc k-Assessment.pdf See also mathematical talk section in white rose scheme of

Mathematics Curriculum Progression					
	negative whole numbers, including through zero round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000 solve number problems and practical problems that involve all of the above read Roman numerals to 1000 (M) and recognise years written in Roman numerals.	Compare and order numbers to one million Round numbers to one million Negative numbers		5 ² is read as '5 to the power of 2' or '5 squared' and means '2 lots of 5 multiplied together' 5 ³ is read as '5 to the power of 3' or '5 cubed' and means '3 lots of 5 multiplied together'	ST JOHN'S SCHOOL
Year 6	Pupils should be taught to: read, write, order and compare numbers up to 10 000 000 and determine the value of each digit round any whole number to a required degree of accuracy use negative numbers in context, and calculate intervals across zero solve number and practical problems that involve all of the above.	 Numbers to ten million Compare and order any number Round any number Negative numbers 	 Understand and use place value in numbers with up to seven digits Multiply and divide whole numbers by 10, 100, 1000 Multiply and divide numbers with one decimal place by 10, 100, 1000 Know the meaning of 'factor' and 'multiple' and 'prime' 	Place value, Digit Negative number (Common) multiple, (Common) factor Divisible Prime number, Composite number Approximate (noun and verb) Round Decimal place Estimate (noun and verb) Accurate, Accuracy	White Rose Number and Place Value Assessment https://whiterosemath s.com/wp-content/upl oads/2018/09/Year-6-P lace-Value_End-of-Bloc k-Assessment.pdf See also mathematical talk section in white rose scheme of learning for key questions.

Threshold Concept: Addition and Subtraction:

Key concepts in the Early Years	Addition and Subtraction	Comparing: Comparison of quantities by identifying more or less	Composition: Part-part-whole relationships.		
	Development Matters, National Curriculum and Statutory Framework Objectives	Sequence of Learning	Essential Prior knowledge for recall	Vocabulary	Key Questions for assessment

Early	Years
Found	dation
Stage	!

Early Learning Goal Numerical Patterns: Early Learning Goal Number:

- Have a deep understanding of numbers to 10, including the composition of each number.
- Subitise (recognise quantities without counting) up to 5.
- Automatically recall (without reference to
- rhymes, counting or other aids) number
- bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.

Numerical Patterns:

- Verbally count beyond 20, recognising the pattern of the counting system.
- Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity.
- Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.

Autumn

- Comparing amounts
- 1 more/less

Spring

- One less
- Composition of 4 & 5
- Equal and unequal
- Composition of numbers 5 2 groups
- How many all together
 - Composition of number to 5 3 groups
- How many are we hiding?
- Making 6
- Combining 2 groups
- Composition of 6,7,8
- Comparing numbers to 9
- Bonds to 9
- Composition of 9 and 10
- Bonds to 10
- Counting back from 10

Summer

- Ten frame addition with 10 frames
- Subtraction from 10 frames
- Taking away
- Doubling
- Grouping

Development Matters 3-4

- Solve real world mathematical problems with numbers up to 5.

4-5:

- Compare numbers.
- Understand the 'one more than/one less than' relationship between consecutive numbers.
- Explore the composition of numbers to 10.
- Automatically recall number bonds for numbers 0–10

Adding and subtracting

add, more, and make, sum, total, altogether score double one more, two more, ten more... how many more to make...?

how many more to make...? how many more is... than...? take (away), leave how many are left/left over? how many have gone? one less, two less... ten less... how many fewer is... than...? difference between

is the same as

how many more is...
than...?
how many fewer is...
than...?
Can you add 4 and 5 by
counting on?
Take away three, how
many are left?

	Mathematics Curriculum Progression					
Year 1	Pupils should be taught to: - read, write and interpret mathematical statements involving addition (+), subtraction (–) and equals (=) signs - represent and use number bonds and related subtraction facts within 20 - add and subtract one-digit and two-digit numbers to 20, including zero - solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as 7 = ? - 9.	Autumn - Part-whole model - Addition symbol - Fact families - addition facts - Find number bonds for numbers within 10 - Systematic methods for number bonds within 10 - Number bonds within 10 - Compare number bonds - Addition-adding together - Finding a part - Subtraction - taking away, how many left? Crossing out - Introducing the subtraction symbol - Subtraction - finding a part, breaking apart - Fact families - the 8 facts - Subtraction - counting back - Subtraction - counting back - Subtraction - finding the difference - Comparing addition and subtraction statements a+b>c - Comparing addition and subtraction statements a+b>c+d Spring - Adding by counting on - Find & make number bonds - Add by making 10 - Subtraction - Not crossing 10 - Related facts - Compare number sentence	 Order numbers to 20 accurately Understand how a number line is organised Count accurately from 0 to 21 Count up to 20 objects accurately and attribute the correct numeral to label the set Subitise small groups of objects (i.e. can say how many there are without needing to count each individual object.) Understand the 'cardinal' value of a set/ array. (Once it has been counted they understand that they don't need to count again.) Identify the number that is one more than a number Identify the number that is one less than a number Know addition and subtraction facts to and from 10 Know addition and subtraction facts within 10 Know addition and subtraction facts to and from 20 Know addition and subtraction facts within 20 Pupils need to be able to count on and back in ones from any given number to 20. Pupils need to be able to read, write and order numbers to at least 20 	Addition and subtraction +, add, more, plus make, sum, total, altogether double, near double one more, two more ten more how many more to make? how much more is? -, subtract, take (away), minus leave how many are left/left over? how many are gone? one less, two less, ten less how much less is? difference between half, halve =, equals, sign, is the same as	https://whiterosemath s.com/resources/assess ment/primary-assessm ent/end-of-block-assess ments/ See also mathematical talk section in white rose scheme of learning for key questions.	
Year 2	Pupils should be taught to: - solve problems with addition and subtraction: using concrete objects and pictorial representations, including those involving numbers, quantities and measures applying their increasing knowledge of mental and written methods recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100	 Fact families - addition and subtraction bonds to 20 Check calculations Compare number sentences Related facts Bonds to 100 (tens) Add and subtract 1s 10 more and 10 less Add and subtract 10s Add a 2-digit and 1-digit number - crossing 10 Subtract a 1-digit number from a 2-digit number - crossing ten 	 Understand the value of digits in two-digit numbers Interpret a mathematical statement involving the symbols + and = or - and = Add and subtract one- and two-digit numbers to 20, including 0 	Addition and subtraction +, add, addition, more, plus make, sum, total, altogether double, near double one more, two more ten more one hundred more how many more to make? how many more is than? how much more is? -, subtract, take away, minus leave, how many are left/left over? one less, two less ten less one hundred less	White Rose Addition and Subtraction Assessment https://whiterosemath s.com/wp-content/uplo ads/2018/09/Year-2-Addition-and-Subtraction.pdf See also mathematical talk section in white rose scheme of learning for key questions.	

	iviatnematics Curriculum	Fiogression	
- add and subtract numbers using concrete objects, pictorial representations, and mentally, including: a two-digit number and ones; a two-digit number and tens; two two-digit numbers; adding three one-digit numbers - show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot - recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	 Add two 2-digit numbers - not crossing ten - add ones and add tens Add two 2-digit numbers - crossing tens - add ones and add tens Subtract a 2-digit number from a 2-digit number - not crossing ten Subtract a 2-digit number from a 2-digit number - crossing ten - subtract ones and tens Bonds to 100 (tens and ones) Add three 1-digit numbers 	how many less is than? how much fewer is? difference between half, halve =, equals, sign, is the same as tens boundary	ST JOHN'S SCHOOL
Year 3 Pupils should be taught to: - add and subtract numbers mentally, including: a three-digit number and ones; a three-digit number and hundreds; add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction - estimate the answer to a calculation and use inverse operations to check answers solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction.	 Add and subtract multiples of 100 Add and subtract 3-digit and 1-digit numbers - not crossing 10 Add 3-digit and 1-digit numbers - crossing 10 Subtract a 1-digit number from a 3-digit number - crossing 10 Add and subtract 3-digit and 2-digit numbers -not crossing 100 Add 3-digit and 2-digit numbers - crossing 100 Subtract a 2-digit number from a 3-digit number - crossing 100 Add and subtract 100s Spot the pattern - making it explicit Add and subtract 2-digit and 3-digit numbers - not crossing 10 or 100 Add a 2-digit and 3-digit number - crossing 10 and 100 Subtract a 2-digit number from a 3-digit number - crossing 10 or 100 Add two 3-digit numbers - not crossing 10 or 100 Add two 3-digit numbers - crossing 10 or 100 Subtract a 3-digit number from a 3-digit number - no exchange Subtract a 3-digit number from a 3-digit number - exchange 	- Know that addition and subtraction are inverse operations - Recall addition and subtraction facts to 20 - Derive addition and subtraction facts to 100 - Add and subtract two-digit numbers and ones (or tens) mentally - Know that addition and subtraction facts to 20 - Column addition, Column subtraction Exchange Operation - Estimate Inverse, Operation	White Rose Addition and Subtraction Assessment https://whiterosemath s.com/wp-content/uplo ads/2018/09/Year-3-Ad dition-and-Subtraction. pdf See also mathematical talk section in white rose scheme of learning for key questions.

	Watnematics Curriculum Progression				
		- Estimate answers to calculations			
		- Check			ST JOHN'S SCHOOL
Year 4	Pupils should be taught to: - add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate estimate and use inverse operations to check answers to a calculation - solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.	 Add and subtract 1s, 10s, 100s, and 1000s Add two 4-digit numbers - no exchange Add two 4-digit numbers - one exchange Add two 4-digit numbers - more than one exchange Subtract two 4-digit numbers - no exchange Subtract two 4-digit numbers - one exchange Subtract two 4-digit numbers - one exchange Subtract two 4-digit numbers - more than one exchange Efficient subtraction Estimate answers Checking strategies 	Find 100 more or less than a given number Use column addition and subtraction for numbers up to three digits	Addition Subtraction Sum, Total Difference, Minus, Less Column addition Column subtraction Exchange Operation Estimate	tion and Subtraction Assessment https://whiterosemath s.com/wp-content/uplo ads/2018/10/Year-4-Ad dition-and-Subtraction v2.pdf See also mathematical talk section in white rose scheme of learning for key questions.
Year 5	Pupils should be taught to: - add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction) - add and subtract numbers mentally with increasingly large numbers - use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy - solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.	Add whole numbers with more than 4 digits (column method) Subtract whole numbers with more than 4 digits (column method) Round to estimate and approximate Inverse operations (addition and subtraction) Multi-step addition and subtraction problems	 Add and subtract numbers mentally, including a three-digit number and ones, tens or hundreds Use column addition and subtraction for numbers up to four digits Estimate the answer to a calculation 	Addition Subtraction Sum, Total Difference, Minus, Less Column addition Column subtraction Exchange Operation Estimate	White Rose Addition and Subtraction Assessment https://whiterosemath s.com/wp-content/uplo ads/2018/10/Year-5-Ad dition-and-Subtraction v2.pdf See also mathematical talk section in white rose scheme of learning for key questions.

		iviatnematics Curriculum	Progression		
Year 6	Pupils should be taught to: - perform mental calculations, including with mixed operations and large numbers - use their knowledge of the order of operations to carry out calculations involving the four operations - solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why - solve problems involving addition, subtraction, multiplication and division - use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.	- Add and subtraction whole numbers	- Use column addition and subtraction for numbers with more than four digits	Addition Subtraction Sum, Total Difference, Minus, Less Column addition Column subtraction Exchange Operation Estimate	https://whiterosemath s.com/wp-content/uplo ads/2018/10/Year-6-Fo ur-Operations-A v2.pdf Assessment B https://whiterosemath s.com/wp-content/uplo ads/2018/10/Mini-Asse ssment-Block-3 Year-6- Four-Operations-B v2. pdf See also mathematical talk section in white rose scheme of learning for key questions.

	degree of accuracy.				

Threshold Concept: Use fractions decimals and percentages

	Development Matters and National Curriculum Objectives	Sequence of Learning	Essential Prior knowledge for recall	Vocabulary	assessment for
Year 1	Pupils should be taught to: - recognise, find and name a half as one of two equal parts of an object, shape or quantity - recognise, find and name a quarter as one of four equal parts of an object, shape or quantity.	- Find a half - Find a quarter	Know the language of double and half Know the meaning of the word 'equal'	Whole, equal parts, four equal parts, one half, two halves, a quarter, two quarters	White Rose Fractions Assessment https://whiterosemath s.com/resources/asses sment/primary-assess ment/end-of-block-ass essments/ See also mathematical
					talk section in white rose scheme of learning for key questions.
Year 2	Pupils should be taught to: - recognise, find, name and write fractions ½, 1 /4, 2/4 and ¾ of a length, shape, set of objects or quantity - write simple fractions for example, ½ of 6 = 3 and recognise the equivalence of 2/4 and ½	 Make equal parts Recognise a half Find a half Recognise a quarter Find a quarter Recognise a third Find a third Unit fractions Non-unit fractions Equivalence of ½ and 2/4 	 Recognise a half as one of two equal parts of an object, shape or quantity Recognise a quarter as one of four equal parts of an object, shape or quantity 	part, equal parts fraction one whole one half, two halves one quarter, two three four quarters	White Rose Fractions Assessment https://whiterosemath s.com/wp-content/upl oads/2019/02/Primary Spring_Mini_Assessm ents/Spring-Block-4-Mi ni-Assessment-Year-2-F ractions.pdf
		- Find three quarters - Count in fractions			See also mathematical talk section in white rose scheme of learning for key questions.

		Mathematics Curriculum F	Progression		
Year 3	Pupils should be taught to: - count up and down in tenths; - recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10 - recognise, find and write fractions of a discrete set of objects: unit fractions and non unit fractions with small denominators - recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators - recognise and show, using diagrams, equivalent fractions with small denominators - add and subtract fractions with the same denominator within one whole [for example, 5/7 + 1/7 = 6/7 - compare and order unit fractions, and fractions with the same denominators - solve problems that involve all of the above.	Spring - Unit and non-unit fractions - Making the whole - Tenths - Count in tenths - Tenths as decimals - Fractions on a number line - Fractions of a set of objects Summer - Equivalent fractions - Compare fractions - Order fractions - Add fractions - Subtract fractions	 Recognise, find, name and write the fractions ¹/₃, ¹/₄, ²/₄ and ³/₄ of a length, shape, set of objects or quantity Write simple fraction statements; e.g. ¹/₂ of 6 = 3 Recognise the equivalence of ²/₄ and ¾ Understand place value in numbers up to 1000 Connect the ten times table to place value Recognise and write unit and non-unit fractions Understand unit and non-unit fractions as numbers on a number line 	Fraction Numerator Denominator Equivalent (fraction) Compare Greater than, less than Notation Horizontal bar for fractions Use of <, > and = symbols when comparing fractions	https://whiterosemath s.com/wp-content/upl oads/2019/03/Primary Mini Assessments/Sp ring-Block-5-Mini-Asse ssment-Year-3-Fraction s.pdf Summer - https://whiterosemath s.com/wp-content/upl oads/2019/04/2019/0 4/2019/04/Year-3-Frac tions.pdf See also mathematical talk section in white rose scheme of learning for key questions.
Year 4	Pupils should be taught to: - recognise and show, using diagrams, families of common equivalent fractions - count up and down in hundredths; - recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten. - solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number - add and subtract fractions with the same denominator	 What is a fraction? Equivalent fractions Fractions greater than 1 Count in fractions Add 2 or more fractions Subtract 2 fractions Subtract from whole amounts Calculate fractions of a quantity Problem solving - calculate quantities Recognise tenths and hundredths Tenths as decimals Tenths on a place value grid Tenths on a number line Divide 1-digit by 10 Divide 2-digits by 10 Hundredths Hundredths as decimals Hundredths on a place value grid 	Recognise and use tenths Divide one digit numbers by 10	Place value Tenth, hundredth Decimal Divide Fraction Numerator Denominator Tenth Hundredth Decimal Notation Decimal point t, h notation for tenths, hundredths	White Rose Fractions Assessment https://whiterosemath s.com/wp-content/upl oads/2019/01/Primary Spring Mini Assessm ents/Spring-Block-3-Ye ar-4-Fractions Assess ment.pdf Decimals Spring Assessment https://whiterosemath s.com/wp-content/upl oads/2019/02/Primary Spring Mini Assessm ents/Spring-Block-4-Mi ni-Assessment-Year-4- Decimals.pdf

- recognise and write decimal equivalents of any number of tenths or hundredths - recognise and write decimal equivalents to ¼, ½, ¾ - find the effect of dividing a one-or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths - round decimals with one decimal place to the nearest whole number - compare numbers with the same number of decimal places up to two decimal places and money problems involving fractions and decimals to two	19/0 Deci tical te
equivalents to %, %, % - find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths - round decimals with one decimal place to the nearest whole number - compare numbers with the same number of decimal places - solve simple measure and money problems involving	19/0 Deci tical te

Mathematics Curriculum Progression

Threshold Concept: Geometry (Properties of shape)

	Development Matters and National Curriculum Objectives	Sequence of Learning	Essential Prior knowledge for recall	Vocabulary	Key Questions for assessment
Early Years Foundation Stage	Early Learning Goal - Shape does not appear as an ELG	Autumn: - Exploring Pattern - Circles & Triangles - Shapes with 4 sides - Comparing shapes Spring - Building with 3D shapes - Matching 3D shapes - Printing with 3D shapes - Making simple patterns - Exploring more complex patterns Summer: - Find and match shapes - Tangrams	Development Matters 3-4: - Talk about and explore 2D and 3D shapes (for example, circles, rectangles, triangles and cuboids) using informal and mathematical language: 'sides', 'corners'; straight', 'flat', 'round'. Make comparisons between objects relating to size, length, weight and capacity Select shapes appropriately: flat surfaces for building, a triangular prism for a roof etc. Combine shapes to make new ones - an arch, a bigger	Exploring patterns, shape and space shape, pattern flat,curved, straight, round hollow, solid corner, face, side, edge, end sort, make, build, draw 3D shapes cube, pyramid, sphere, cone 2D shapes circle, triangle, square, rectangle, star Patterns and symmetry size, bigger, larger, smaller symmetrical, pattern, repeating pattern Position, direction and movement position, over, under, above, below top, bottom, side, on, in	Which shape is a? How many can we see in the classroom? Shape hunt around the school Build a model using blocks of different shape - can you tell me how many you've used?

	i e	iviatnematics Curriculum i		.	
		 Making new shapes with 2 right angled triangles Making new shapes with squares Pattern blocks 	triangle etc. Talk about and identify the patterns around them. For example: stripes on clothes, designs on rugs and wallpaper. Use informal language like 'pointy', 'spotty', 'blobs' etc. Extend and create ABAB patterns – stick, leaf, stick, leaf. Notice and correct an error in a repeating pattern. 4-5: Compose and decompose shapes so that children recognise a shape can have other shapes within it, just as numbers can. Continue, copy and create repeating patterns.	outside, inside, around, in front, behind front, back, before, after,beside, next to opposite, apart, between, middle, edge corner, direction, left, right, up, down forwards, backwards, sideways, across close, far, near,along, through, to, from, towards, away from, movement slide,roll, turn, stretch, bend	ST JOHN'S SCHOOL
Year 1	Pupils should be taught to: - recognise and name common 2-D and 3-D shapes, including: 2-D shapes [for example, rectangles (including squares), circles and triangles] 3-D shapes [for example, cuboids (including cubes), pyramids and spheres].	 Recognise and name 3D shapes Sort 3D shapes Recognise and name 2D shapes Sort 2D shapes Patterns with 3D and 2D shapes 		Shape and space shape, pattern flat,curved, straight, round hollow, solid corner, point, pointed, face, side, edge, end sort, make, build, draw 3D shapes cube, cuboid, pyramid, sphere, cone cylinder 2D shapes circle, triangle, square, rectangle, star Patterns and symmetry size, bigger, larger, smaller symmetrical, pattern, repeating pattern	See also mathematical talk section in white rose scheme of learning for key questions.
Year 2	Pupils should be taught to: identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]	 Recognise 2D and 3D shapes Count sides on 2D shapes Count vertices on 2D shapes Lines of symmetry Sort 2D shapes Make patterns with 2D shapes Count faces on 3D shapes Count edges on 3D shapes Count vertices on 3D shapes Sort 3D shapes Make patterns with 3D shapes 	 Recognise and name different 2 D shapes Find everyday examples of 2-D shapes Recognise and name different 3 D shapes Find everyday examples of 3-D shapes 	Shape and space shape, pattern flat,curved, straight, round hollow, solid corner, point, pointed, face, side, edge, end, surface sort, make, build, draw 3D shapes cube, cuboid, pyramid, sphere, cone cylinder 2D shapes circle, circular, triangle, triangular, square, rectangle, rectangular star, pentagon, hexagon, octagon	White Rose Properties of Shape Assessment https://whiterosemaths.com/wp-content/uploads/2019/01/Primary Spring Mini Assessments/Spring-Block-3-Year-2-Properties-of-Shape Assessment.pdf See also mathematical talk section in white rose scheme of learning for key questions.

		Mathematics Curriculum F	rogression		
Year 3	- compare and sort common 2-D and 3-D shapes and everyday objects. Pupils should be taught to: - draw 2-D shapes and make 3-D shapes using modelling materials; - recognise 3-D shapes in different orientations and describe them - recognise angles as a property of shape or a description of a turn - identify right angles, - recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; - identify whether angles are greater than or less than a right angle - identify horizontal and vertical lines and pairs of perpendicular and parallel lines.	- Turns and angles - Right angles in shapes - Compare angles - Draw accurately - Horizontal and vertical - Parallel and perpendicular - Recognise and describe 2D shapes - Recognise and describe 3D shapes - Make 3D shapes	 Know the names of common 2D shapes Know the names of cuboids, prisms, spheres, pyramids and cones Know the meaning of side, edge, vertex (vertices) and face Use a straightedge to construct lines and shapes Recognise and name the fractions ¹/₂, ¹/₄, ²/₄, ³/₄ 	Patterns and symmetry size, bigger, larger, smaller symmetrical, pattern, repeating patter line of symmetry fold, match mirror line, reflection Horizontal, Vertical, Perpendicular Parallel Face, Edge, Vertex (Vertices) Cube, Cuboid, Prism, Cylinder, Pyramid, Cone, Sphere Quadrilateral, Square, Rectangle, Parallelogram, (Isosceles) Trapezium, Kite, Rhombus, Triangle, Circle Polygon, Hexagon, Pentagon, Octagon, Decagon Notation Arrow notation to represent parallel lines Right angle notation for perpendicular lines	White Rose Properties of Shape Assessment https://whiterosemaths.com/wp-content/uploads/2019/05/Year-3-Properties-of-Shape.pdf See also mathematical talk section in white rose scheme of learning for key questions.
Year 4	Pupils should be taught to: - compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes - identify acute and obtuse angles and compare and order angles up to two right angles by size - identify lines of symmetry in 2-D shapes presented in different orientations - complete a simple symmetric figure with respect to a specific line of symmetry	 Identify angles Compare and order angles Triangles Quadrilaterals Lines of symmetry Complete a symmetric figure 	 Reflect a shape in a vertical line of symmetry Use a ruler to construct a straight line joining two points Know the names of special quadrilaterals Understand angles as a measure of turn Recognise angles in shapes Identify right angles as a quarter turn 	Turn Angle Right angle Acute angle Obtuse angle Greater than, less than Notation Right angle notation Arc notation for all other angles	White Rose Properties of Shape Assessment https://whiterosemaths.com/wp-content/uploads/2019/06/Year-4-Block-5 Properties-of-shapes.pdf See also mathematical talk section in white rose scheme of learning for key questions.

		Mathematics Curriculum F	rogression		
Year 5	Pupils should be taught to: identify 3-D shapes, including cubes and other cuboids, from 2-D representations know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles draw given angles, and measure them in degrees: identify: angles at a point and one whole turn (total 3600) angles at a point on a straight line and 2 1 a turn (total 1800) other multiples of 900 use the properties of rectangles to deduce related facts and find missing lengths and angles distinguish between regular and irregular polygons based on reasoning about equal sides and angles.	 Measuring angles in degrees Measuring with a protractor Drawing lines and angles accurately Calculating angles on a straight line Calculating angles around a point Calculating lengths and angles in shapes Regular and irregular polygons Reasoning about 3D Shapes 	 Identify right angles Use coordinates in the first quadrant Understand that an acute angle is less than a right angle Understand that an obtuse angle is greater than a right angle and less than two right angles Identify acute angles Identify obtuse angles Identify acute, obtuse and right angles in shapes Compare angles up to two right angles in size Order angles up to two right angles in size 	Turn Angle Degrees Right angle Acute angle Obtuse angle Reflex angle Protractor Notation Right angle notation Arc notation for all other angles The degree symbol (°)	erties nent maths. com/wp-content/uploa ds/2019/04/Year-5-Prop erties-of-Shape.pdf See also mathematical talk section in white rose scheme of learning for key questions.
Year 6	Pupils should be taught to: draw 2-D shapes using given dimensions and angle recognise, describe and build simple 3-D shapes, including making nets compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.	 Measure with a protractor Introduce angles Calculate angles Vertically opposite angles Angles in a triangle Angles in a triangle - special cases Angles in a triangle - missing angles Angles in special quadrilaterals Angles in regular polygons Draw shapes accurately Draw nets of 3D shapes 	 Know the names of common 2D shapes Know the names of common 3D shapes Use a protractor to measure and draw angles: Know the properties of rectangles Know the difference between a regular and an irregular polygon Add and subtract numbers up to three digits 	Protractor. Measure Cube, Cuboid, Cylinder, Pyramid, Prism Net, Edge, Face, Vertex (Vertices) Quadrilateral, Square, Rectangle, Parallelogram, (Isosceles) Trapezium, Kite, Rhombus, Delta, Arrowhead Triangle, Scalene, Right-angled, Isosceles, Equilateral Polygon, Regular, Irregular Pentagon, Hexagon, Octagon, Decagon, Dodecagon Circle, Radius, Diameter, circumference, Centre Parallel, Diagonal Angle Notation Dash notation to represent equal lengths in shapes and geometric diagrams Right angle notation	White Rose Assessment Properties of shape https://whiterosemaths. com/wp-content/uploa ds/2019/04/2019/04/20 19/04/Year-6-Properties -of-Shape.pdf See also mathematical talk section in white rose scheme of learning for key questions.

Threshold Concept: Geometry (Describe position, direction and movement)

	Development Matters and National Curriculum Objectives	Sequence of Learning	Essential Prior knowledge for recall	Vocabulary	Key Questions for assessment
Early Years Foundation Stage	Early Learning Goal: - Not in the ELGs	Autumn - Spatial Awareness Summer - Spatial Reasoning - Visualise and Build - Mapping	Development Matters 3-4 Understand position through words alone – for example, "The bag is under the table," – with no pointing. Describe a familiar route. Discuss routes and locations, using words like 'in front of' and 'behind'. 4-5 Select, rotate and manipulate shapes in order to develop spatial reasoning skills.	position over, under above, below top, bottom, side on, in outside, inside around in front, behind front, back beside, next to opposite apart between middle, edge corner direction left, right up, down forwards, backwards, sideways across next to, close, near, far along through to, from, towards, away from movement slide roll turn stretch, bend whole turn, half turn	 Show them a picture/set up a tuff top - which animal is behind the tree? What is in front of the rocks? PE lesson with large obstacles and child have to move themselves
Year 1	Pupils should be taught to: describe position, direction and movement, including whole, half, quarter and three- quarter turns.	- Describe turns - Describe position	 Describe position using language such as 'behind' or 'next to' Know the language of half and quarter 	position, over, under, underneath above, below, top, bottom, side on, in, outside, inside, around, in front, behind, front, back before, after, beside, next to, opposite apart, between middle, edge, centre, corner, direction journey,left, right,up, down forwards, backwards, sideways across, close, far, near, along, through to, from, towards, away from movement, slide, roll, turn, whole turn, half turn stretch, bend	White Rose Position and Direction Assessment https://whiterosemaths.com/resources/assessment/primary-assessment/end-of-block-assessments/See also mathematical talk section in white rose scheme of learning for key questions.
Year 2	Pupils should be taught to: - order and arrange combinations of mathematical objects in patterns and sequences - use mathematical vocabulary to describe position, direction and movement, including	 Describing movement Describing turns Describing movement and turns Making patterns with shapes 	 Describe position using language such as 'behind', 'next to', 'on top of' and 'between' Describe position, direction and movement, including whole, half, quarter and three-quarter turns Connect moving clockwise with movement on a clock face 	position, over, under, underneath above, below,top, bottom, side on, in, outside, inside, around, in front, behind, front, back,before, after beside, next to,,opposite, apart, between middle, edge, centre, corner, direction journey, route, left, right, up, down	White Rose Position and Direction Assessment https://whiterosemaths.com/wp-content/uploads/2019/04/2019/04/2019/04/Year-2-Position-and-Direction.pdf See also mathematical talk section in white rose

		iviathematics Curriculun	n Progression	-	
	movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anticlockwise).			higher, lower, forwards, backwards, sideways,across, close, far, near along, through, to, from, towards, away from clockwise, anti-clockwise movement, slide,roll, whole turn, half turn, quarter turn, right angle straight line,stretch, bend	ST JOHN'S SCHOOL
Year 3				Half, Quarter, Three quarters Angle, Turn, Right angle Greater than, less than Notation Right angle notation	
Year 4	Pupils should be taught to: - describe positions on a 2-D grid as coordinates in the first quadrant - describe movements between positions as translations of a given unit to the left/right and up/down - plot specified points and draw sides to complete a given polygon.	 describe position draw on a grid move on a grid describe a movement on a grid 	 Know names and basic properties of polygons Know the language of movement; left, right, up and down 	2-D Grid, Axis, axes, x-axis, y-axis, Origin (First) quadrant, coordinates Point, Translation, Transformation Left, right, up, down Notation Coordinates should be separated by a comma and enclosed in brackets (x, y)	White Rose Position and Direction Assessment https://whiterosemaths.com/wp-content/uploads/2019/06/Year-4-Block-6Position-and-direction.pdfSee also mathematical talk section in white rose scheme of learning for key questions.
Year 5	Pupils should be taught to: - identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.	 position in the first quadrant reflection reflection with coordinates translation translation with coordinates 	 Use coordinates in the first quadrant Describe a translation using mathematical language 	2-D Grid, Axis, axes, x-axis, y-axis, Origin (First) quadrant, coordinates Point, Translation, Transformation, Reflection, Transformation Object, Image Congruent, congruence Notation coordinates should be separated by a comma and enclosed in brackets (x, y)	White Rose Position and Direction Assessment https://whiterosemaths.com/wp-content/uploads/2019/05/Year-5-Position-and-direction-1.pdf See also mathematical talk section in white rose scheme of learning for key questions.
Year 6	Pupils should be taught to: describe positions on the full coordinate grid (all four quadrants) draw and translate simple shapes on the coordinate plane, and reflect them in the axes.	- The first quadrant - Four quadrants - Translations - Reflections	 Use coordinates in the first quadrant Identify a translation Carry out a translation in the first quadrant Identify a reflection Carry out a reflection in the first quadrant using mirror lines parallel to the axes 	2-D Grid, Axis, axes, x-axis, y-axis, Origin Four Quadrants, coordinates Point, Translation, Reflection, Transformation Object, Image Congruent, congruence Notation	White Rose Position and Direction Assessment https://whiterosemaths.com/wp-content/uploads/2018/Mini_Assessments Primary Autumn/Year-6-Position-and-Direction.pdf

Mathematics Curriculum Progression				
	Know the meaning of 'congruent', 'congruence', 'object', 'image'	coordinates should be separated by a comma and enclosed in brackets (x, y)	key questions.	ıg for

Threshold Concept: Measures (Time, Length, Mass, Capacity, Perimeter, Area, Volume, Converting Units and Money)

	Development Matters and National Curriculum Objectives	Sequence of Learning	Essential Prior knowledge for recall	Vocabulary	Key Questions for assessment
Early Years Foundation Stage	Early Learning Goal: - Not within the ELG	Autumn - Compare size, mass and capacity - Night & Day/Time Spring - Comparing mass - Comparing capacity - Measuring capacity - Measuring ingredients - Comparing length - Comparing height - Days of the week - Measuring height - Measuring height - Measuring time	Development Matters 3-4 Make comparisons between objects relating to size, length, weight and capacity Select shapes appropriately: flat surfaces for building, a triangular prism for a roof etc. Combine shapes to make new ones - an arch, a bigger triangle etc. Talk about and identifies the patterns around them. For example: stripes on clothes, designs on rugs and wallpaper. Use informal language like 'pointy', 'spotty', 'blobs' etc.	Problems involving 'real life' or money compare double, half, halve pair, count out, share out left, left over money, coin, penny, pence, pound, price, cost, change costs the same as how much? how many? total Measures (general) measure, size, compare, guess, estimate enough, not enough, too much, too little, too many, too few nearly, close to, about the same as just over, just under	how much? how many? how many one pence coins do you need to make? What's the total? Which is the longest etc? Which is the lightest etc? Which bottle is full etc? What day is it today? What day was it yesterday?

		iviathematics curriculum		•	_
			Extend and create ABAB patterns – stick, leaf, stick, leaf. Notice and correct an error in a repeating pattern. Begin to describe a sequence of events, real or fictional, using words such as 'first', 'then' 4-5 Compare length, weight and capacity.	Length length, width, height, depth long, short, tall, high, low wide, narrow, deep, shallow thick, thin, longer, shorter, taller, higher and so on longest, shortest, tallest, highest and so on far, near, close Mass weigh, weighs, balances heavy/light, heavier/lighter, heaviest/lightest balance, weight, scales Capacity full, half full, empty, holds,container Time time, days of the week: Monday, Tuesday, day, week birthday, holiday morning, afternoon, evening, night bedtime, dinnertime, playtime today, yesterday, tomorrow before, after, next, last now, soon, early, late quick, quicker, quickest, quickly slow, slower, slowest, slowly old, older, oldest new, newer, newest takes longer, takes less time clock, watch, hands	It is phonics now, what happens next?
Year 1	Pupils should be taught to: - compare, describe and solve practical problems for: lengths and heights [for example, long/short, longer/shorter, tall/short, double/half] - mass/weight [for example, heavy/light, heavier than, lighter than] - capacity and volume [for example, full/empty, more than, less than, half, half full, quarter] - time [for example, quicker, slower, earlier, later]	Length and Height - Compare lengths and height - Measure length Weight and Volume - Introduce weight and mass - Measure mass - Compare mass - Introduce capacity and volume - Measure capacity - Compare capacity Money - Recognising coins - Recognising notes - Counting in coins Time	 Order numbers to 12 Understand how a number line is organised Understand the concept of time Beginning to use everyday language related to money 	Money money, coin, penny, pence, pound, price, cost, buy, sell, spend, spent pay,change, dear, costs more cheap, costs less, cheaper costs the same as how much? how many? total Measures (general) measure, size, compare, guess, estimate enough, not enough,too much, too little, too many, too few, nearly, roughly, close to, about the same as just over, just under Length length, width, height, depth	White Rose Money Assessment https://whiterosemaths.c om/resources/assessmen t/primary-assessment/en d-of-block-assessments/ See also mathematical talk section in white rose scheme of learning for key questions.

Mathematics Curr	iculum Progression
-------------------------	--------------------

		Mathematics Curriculum	Progression		
	 measure and begin to record the following: lengths and heights mass/weight capacity and volume time (hours, minutes, seconds) recognise and know the value of different denominations of coins and notes sequence events in chronological order using language [for example, before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening] recognise and use language relating to dates, including days of the week, weeks, months and years tell the time to the hour and draw the hands on a clock face to show these times 	 Before and after Dates Time to the hour Writing time Comparing time 		long, short, tall, high, low, wide, narrow,deep, shallow, thick, thin longer, shorter, taller, higher and so on,longest, shortest, tallest, highest and so on,far, near, close metre, ruler, metre stick Mass weigh, weighs, balances heavy/light, heavier/lighter, heaviest/lightest balance, scales, weight Capacity full,half full, empty,holds, container Time days of the week: Monday, Tuesday seasons: spring, summer, autumn, winter day, week, month, year, weekend, birthday, holiday morning, afternoon, evening night, midnight bedtime, dinnertime, playtime today, yesterday, tomorrow before, after,next, last now, soon, early, late quick, quicker, quickest, quickly fast, faster, fastest slow, slower, slowest, slowly old, older, oldest new, newer, newest takes longer, takes less time hour, o'clock, half past clock, watch, hands how long ago?, how long will it be to? ,how often? always, never, often, sometimes, usually, once, twice	ST JOHN'S SCHOOL
Year 2	Pupils should be taught to: - choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass	Money - Count money - pence - Count money - pounds (notes and coins) - Count money (notes and coins) - Select money	 Read the time to the hour and half past Draw the hands on a clock face to show the time to the hour or half past Know the meaning of before, 	Money money coin penny, pence, pound, (£) price, cost buy, bought, sell, sold spend, spent pay change dear, costs more cheap, costs less, cheaper	White Rose Money Assessment https://whiterosemaths.c om/wp-content/uploads/ 2018/10/Mini-Assessmen t-Block-3 Year-2-Money.p
	(kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit,	- Make the same amount - Compare money - Find the total	after, next, first, today, yesterday, tomorrow, morning, afternoon, evening and o'clock	how much? how many? total Measures (general)	df Length and Height Assessment

- using rulers, scales, thermometers and measuring vessels
- compare and order lengths, mass, volume/capacity and record the results using >, < and =
- recognise and use symbols for pounds (£) and pence (p): combine amounts to make a particular value
- find different combinations of coins that equal the same amounts of money
- solve simple problems in a practical context involving addition and subtraction of money of the same unit. including giving change
- compare and sequence intervals of time
- tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times
- know the number of minutes in an hour and the number of hours in a day.

- Find the difference
- Find change
- Two-step problems

Length and Height

- Measure length
- Compare Lengths
- Order lengths
- Four operations with lengths

Time

- O'clock and half past
- Quarter past and quarter to
- Telling the time to 5 minutes
- Hours and days
- Find durations of time
- Compare durations of time

- Use the language long, short, tall, heavy, light, full, empty, more than, less than, double, half
- Use a ruler, weighing scale and container to measure length, mass and capacity
- Know and use the symbols >, < and =
- Add and subtract one- and two-digit numbers to 20
- Recognise the coins: 1p, 2p, 5p, 10p, 20p, 50p, £1 and £2
- Recognise the notes: £5 and £10

measure, size compare *measuring* scale

guess, estimate enough, not enough too much, too little too many, too few nearly, roughly, about, close to, about the same as just over, just under

Length

length, width, height, depth long, short, tall, high, low wide, narrow, deep, shallow, thick, thin

longer, shorter, taller, higher... longest, shortest, tallest, highest... far, further, furthest, near, close metre (*m*), *centimetre* (*cm*) ruler, metre stick, tape measure

Mass

weigh, weighs, balances heavy/light, heavier/lighter, heaviest/lightest kilogram (kg), half-kilogram, gram(g) balance, scales, weight

Capacity

capacity full, half full empty holds, contains litre (I), half-litre, millilitre (ml) container

Time

time days of the week: Monday, Tuesday... months of the year: January, February...seasons: spring, summer, autumn, winter day, week, fortnight, month, year weekend birthday, holiday morning, afternoon, evening, night, midnight bedtime, dinnertime. playtime today, yesterday, tomorrow before, after next, last now, soon, early, late quick, quicker, quickest, quickly fast, faster, fastest slow, slower, slowest, slowly old, older, oldest new, newer, newest takes longer, takes less time how long ago?/how long will it be to...? how long will it take to...?

	National Curriculum Objectives	Sequence of Learning	Essential Prior knowledge for recall	Vocabulary	Key Questions for assessment
Year 1				Organising and using data count, sort, <i>vote</i> list, group, set <i>table</i>	

		Mathematics Curriculum	1 Progression		_
Year 2	Pupils should be taught to: - interpret and construct simple pictograms, tally charts, block diagrams and simple tables - ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity - ask and answer questions about totalling and comparing categorical data.	 Make tally charts Draw pictograms (1-1) Interpret pictograms(1-1) Draw pictograms(2, 5 and 10) Interpret pictograms (2,5 and 10) Block diagrams 	 Count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number Compare the value of numbers Order numbers 	Count, tally, sort, vote, graph, block graph, pictogram, represent, group, set, list, table, label, title, most popular, most common, least popular, least common	ics maths.c om/wp-content/uploads/ 2019/01/Primary Spring Mini Assessments/Spri ng-Block-2-Year-2-Statisti cs.pdf See also mathematical talk section in white rose scheme of learning for key questions.
Year 3	Pupils should be taught to: - interpret and present data using bar charts, pictograms and tables - solve one-step and two-step questions [for example, 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables.	- Pictograms - Bar charts - Tables	 Interpret and construct block diagrams Interpret and construct pictograms where the symbol represents a single item or 2,5 and 10 units. Interpret and construct simple tables Understand tallying 	Data, Pictogram Symbol Key Tally Bar chart Table Total Compare Axis Notation When tallying, groups of five are created by striking through each group of four	White Rose Statistics Assessment https://whiterosemaths.c om/wp-content/uploads/ 2019/01/Primary Spring Mini_Assessments/Spri ng-Block-3-Year-3-Statisti cs_Assessment.pdf See also mathematical talk section in white rose scheme of learning for key questions.
Year 4	Pupils should be taught to: - interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs. - solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.	 interpret charts comparison, sum and difference introducing line graphs line graphs 	 Interpret and construct a pictogram where the symbol represents multiple items Interpret and construct a simple bar chart where one centimetre represents 2, 5 or 10 items Interpret and construct tables of data 	Data Pictogram Symbol Key Tally Bar chart Time graph Scale Axis Graph Frequency	White Rose Statistics Assessment https://whiterosemaths.c om/wp-content/uploads/ 2019/06/Year-4-Statistics .pdf See also mathematical talk section in white rose scheme of learning for key questions.
Year 5	Pupils should be taught to: - solve comparison, sum and difference problems using information presented in a line graph - complete, read and interpret information in tables, including timetables.	 Read and interpret line graphs Draw line graphs Use line graphs to solve problems Read and interpret tables Two-way tables Timetables 	- Interpret and construct a simple bar chart	Data Scale Axis Graph Frequency Time graph, Time series Line graph Bar-line graph, vertical line chart Maximum, minimum	White Rose Statistics Assessment https://whiterosemaths.c om/wp-content/uploads/ 2018/10/Mini-Assessme nt-Block-3_Year-5-Statisti cs.pdf See also mathematical talk section in white rose

					ST JOHN'S SCHOOL
Year 6	Pupils should be taught to: interpret and construct pie charts and line graphs and use these to solve problems calculate and interpret the mean as an average.	 read and interpret line graphs draw line graphs use line graphs to solve problems circles read and interpret pie charts pie charts with percentages draw pie chart the mean 	 Measure and construct angles using a protractor Interpret and construct a simple line graph Approximate a number by rounding to a given number of decimal places 	Data Scale Axis, axes Graph Frequency Time graph, Time series Line graph Pie chart Sector Angle Protractor Degrees Maximum, minimum Average Mean Measure Data Statistic Statistics Approximate Round	ics Assessment https://whiterosemaths.com/wp-content/uploads/2019/05/Year-6-Statistics.pdf See also mathematical talk section in white rose scheme of learning for key questions.

Threshold Concept: Use algebra (Year 6 only)

	Development Matters and NC Objectives	Sequence of Learning	Essential Prior knowledge for recall	Vocabulary	Key Questions for assessment
Year 6	Pupils should be taught to: use simple formulae generate and describe linear number sequences express missing number problems algebraically find pairs of numbers that satisfy an equation with two unknowns enumerate possibilities of combinations of two variables.	- find a rule - one step - find a rule - two step - forming expressions - substitution - formulae - forming equations - solve simple one-step equations - solve two-step equations - find pairs of values - enumerate possibilities	 Know the order of operations Know the fact that area of rectangle = length × width Use symbols to represent variables in a formula 	Algebra, algebraic, algebraically Symbol Expression Variable Substitute Equation Unknown Enumerate Pattern Sequence Linear Term Ascending Descending Notation The lower case and upper case of a letter should not be used interchangeably when worked with algebra Juxtaposition is used in place of 'x'. 2a is used rather than a2. Division is written as a fraction Formula, Formulae Expression Variable Substitute Symbol Mile Kilometre Metric Imperial Notation When written algebraically a formula should not include any units.	White Rose Algebra Assessment https://whiterosemaths. com/wp-content/upload s/2019/01/Primary Spri ng Mini Assessments/S pring-Block-3-Year-6-Algebra Assessment.pdf See also mathematical talk section in white rose scheme of learning for key questions.

Threshold Concept: Ratio and proportion (Y6 only)

	NC Objectives	Sequence of Learning	Essential Prior knowledge for recall	Vocabulary	ass ST JOHN'S SCHOOL
Year 6	Pupils should be taught to: - solve problems involving the relative sizes of two quantities where missing values - can be found by using integer multiplication and division facts - solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for comparison - solve problems involving similar shapes where the scale factor is known or can be found - solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.	Using ratio language Ratio and fractions Introducing the ratio symbol Calculating ratio Using scale factors Calculating scale factors Ratio and proportion problems	Recall multiplication facts for multiplication tables up to 12 × 12 Recall division facts for multiplication tables up to 12 × 12 Find fractions of an amount Find multiples of a given number	Proportion Quantity Integer Similar (shapes) Enlargement Scale factor Group Share Multiples	White Rose Ratio Assessment - https://whiterosemaths.co m/wp-content/uploads/20 19/03/Primary_Mini_Asses sments/Spring-Block-6-Min i-Assessment-Year-6-Ratio. pdf See also mathematical talk section in white rose scheme of learning for key questions
